Universal Search
Search basics

Google “search basics” for quick tips

• Don’t worry about capitalization
• *and, of, a, and the* are generally ignored
• No need to include punctuation
• AND operator is the default
• Use OR when you want either of two words
• Use quotes “ ” to search for exact phrases
• Exceptions (who vs. the who, C++)

Think about how the page you’re looking for will be written
Spell check

Correspondence: Peter Stenvinkel, M.D., Ph.D., Department of Renal Medicine K36, Karolinska Institutet, Huddinge University Hospital, 141 86 Huddinge, Stockholm, Sweden. E-mail: peter.stenvinkel@ki.se

Received 6 October 1998; Revised 14 December 1998; Accepted 14 December 1998.

ABSTRACT

Strong association between malnutrition, inflammation, and atherosclerosis in chronic renal failure.

Background Atherosclerotic cardiovascular disease and malnutrition are widely recognized as leading causes of the increased morbidity and mortality observed in uremic patients. C-reactive protein (CRP), an acute-phase protein, is a predictor of cardiovascular mortality in nonrenal patient populations. In chronic renal failure (CRF), the prevalence of an acute-phase response has been associated with an increased mortality.

Rationalist explanations for war
James D. Fearon

The central puzzle about war, and also the main reason we study it, is that wars are costly but nonetheless wars recur. Scholars have attempted to resolve the puzzle with three types of argument. First, one can argue that people (and state leaders in particular) are sometimes or always irrational. They are subject to biases and pathologies that lead them to neglect the costs of war or to misunderstand how their actions will produce it. Second, one can argue that the leaders who order war enjoy its benefits but do not pay the costs, which are suffered by soldiers and citizens. Third, one can argue that even rational leaders who consider the risks and costs of war may end up fighting.

CITIZENS UNITED v. FEDERAL ELECTION COMM’N (No. 08-205)
Reversed in part, affirmed in part, and remanded.

Opinion of Stevens, J.

SUPREME COURT OF THE UNITED STATES
CITIZENS UNITED, APPELLANT v. FEDERAL ELECTION COMMISSION

ON APPEAL FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

[January 21, 2010]

JUSTICE STEVENS, with whom JUSTICE GINSBURG, JUSTICE BREYER, and JUSTICE SOTOMAYOR join, concurring in part and dissenting in part.

The real issue in this case concerns how, not if, the appellant may finance its electioneering. Citizens United is a wealthy nonprofit corporation that runs a political action committee (PAC) with millions of dollars in assets. Under the Bipartisan Campaign Reform Act of 2002 (BCRA), it could have used these assets to teleview and promote Hillary: The Movie whenever and wherever it wanted to. It also could have spent unrestricted sums to broadcast Hillary at any time other than the 30 days before the last primary election. Neither Citizens United’s nor any other corporation’s speech has been “banned,” ante, at 1. All that the parties dispute is whether Citizens United had a right to use the funds in its general enterprise pool for broadcasts during the 30-day period. The notion that the First Amendment denies corporations the affirmative power to use their property for political purposes is foreign to our precedent. This case presents a categorical challenge to our longstanding rule that corporations and unions may spend money independently of candidates in order to express their views about political candidates or issues. That rule is not justified by the government’s interest in protecting the integrity of elections. And the rule is not a rational means to any legitimate end.

The Idea of a Catholic University

By Dennis O'Brien

Book overview

George Bernard Shaw thought that a Catholic university was a contradiction in terms—"university" represents intellectual freedom and "Catholic" represents dogmatic belief. Scholars, university administrators, and even the Vatican have staked out positions debating Shaw's observation. In this refreshing book, George Dennis O'Brien argues that contradiction arises both from the secular university's limited concept of academic freedom and the church's defective notion of dogma.

Truth is a central concept for both university and church, and O'Brien's book is built on the idea that there are different areas of truth—scientific, artistic, and religious—and intrinsic impossibility how they interact with each other. In this light, he argues that one can reverse Shaw's observation and uncover academic dogma and Christian freedom. University "infallibility" and dogmatic "falsifiability." Drawing on theology and the history of philosophy, O'Brien shows how religious truth relates to the work of a Catholic university. He then turns to the current controversies over Pope John Paul II's recent statement, "Ex Corde Ecclesiae," which seeks to make Catholic universities conform to the church's official teaching office. O'Brien rejects the conventional "institutional-judicial" model used by the Vatican as improper both to faith and academic freedom. He argues for a "sacramental" model, one that respects the different kinds of "truth"—thus preserving the integrity of both church and university while making their combination in a Catholic university not only possible but desirable. O'Brien concludes with a practical consideration of how the ideal Catholic university might be expressed in the actual life of the contemporary curriculum and extracurriculum.

For anyone concerned about the place of religion in higher education, "The Idea of a Catholic University" will be essential reading.

The intellectual appeal of Catholicism & the idea of a Catholic university

Book overview
MARK W. ROCHE PRESENTS A CLEAR, precise, and positive view of the challenge and promise of a Catholic university. Roche makes visible the ideal of a Catholic university and illuminates in original ways the diverse, but interconnected, dimensions of Catholic identity. Roche’s vision of the distinct intellectual mission of a Catholic university will appeal to Catholics as well as to persons who are not Catholic but who may recognize through this essay the unexpected allure of a religiously based university.

EDITORIAL

Men walk on the moon

The first steps on a new frontier are always momentous. The first man on the moon will be etched in history as a major milestone in human progress.

Comment
No election

The National Union party campaign has now entered its final phase. The party is in a strong position to win a majority, but there is still uncertainty about the outcome.

Crowded parks

Canada has 10 national parks, but they are often crowded in summer. As the weather becomes warmer, the parks become more popular. The issue of managing these parks is a major concern.
